The Fast, Easy and Effective Way

- To Preserve Forage Quality
- Increase Animal Production!

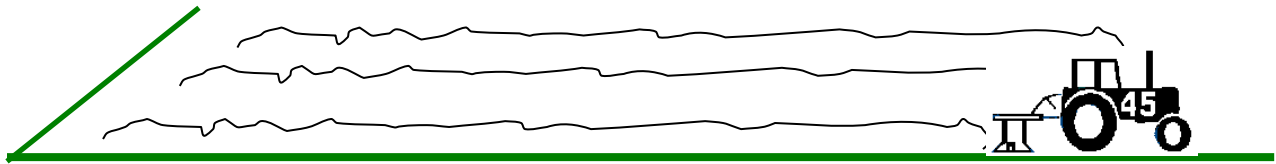

## Hayday 1507 Big Bale Wrapper

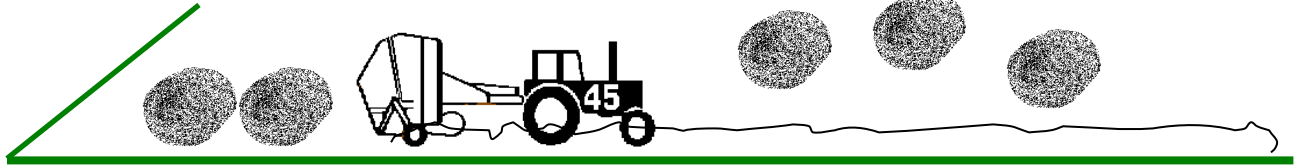

- *Efficient:* Wrap while positioning bales for storage.
- *Stable:* Support skid for light tractors.
- *Versatile:* Can wrap, can handle and maneuver bales.
- *Made:* In Ohio, USA US PAT. 4.821.481

**HAYDAY 1507 BIG BALE WRAPPER**

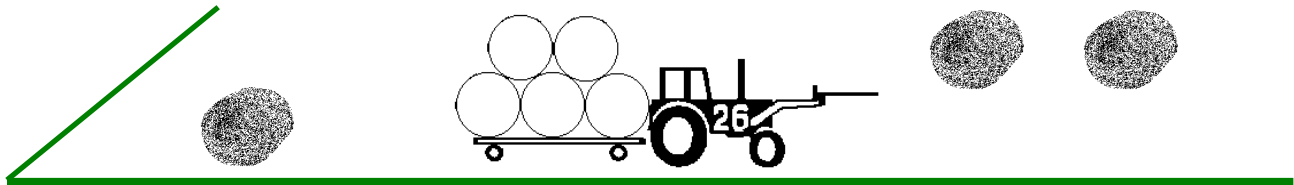

# Efficient baleage making with **HAYDAY** big bale wrapper

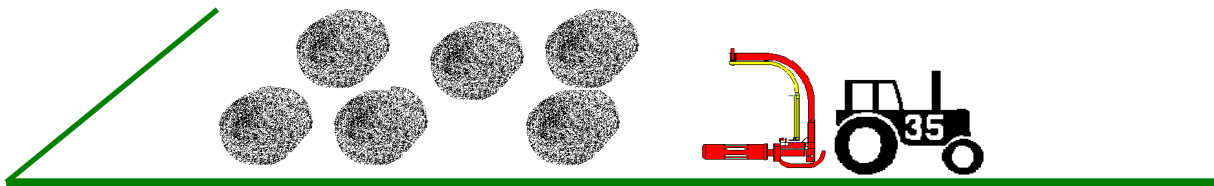

Mow and condition, wilt crops or pasture to 50% moisture

Bale slowly to make fewer, denser bales for better silage and fewer bales to haul, wrap, stack, store and feed.

Transport unwrapped bales to storage site by trailer or truckloads to reduce handling time.

Wrap bales as soon as possible but always within four (4) hours after baling.

## HAYDAY 1507 TECHNICAL DATA

- |   |  |
|---|--|
| • Length 2.53m (8'4") Skid Plate attached     | • Film application 55% pre-stretch 2 + 2   |
| • Width 1.50m (5') Rollers in closed position | • Hydraulic pressure 150 bar (2250psi)     |
| • Height 2.54m (8'3") Skid Plate attached     | • Hydraulic flow 37 l/m (10US gpm) maximum |
| • Height 1.27m (4'2") O/H arm lowered         | • Attachment to tractor CAT II             |
| • Weight 580kg (1280lbs) approx.              | • Electrical requirements 12VDC            |
